Session 1. Classroom Management for Second Language Acquisition

Margreet Vogelzang

OBJECTIVES

By the end of the session, you will be able to:

- **Identify** different classroom seating arrangements and explain their purposes
- **Understand** how daily routines can support an organised and positive learning environment
- **Explain** the steps involved in delivering clear and effective instructions
- **Identify** the key components of effective lesson planning

OVERVIEW

- Seating
- Classroom management
- Classroom instructions
- Effective lesson planning

WHAT'S YOUR CLASSROOM LIKE?

Tell us about your classroom experience as a teacher (or as a student)

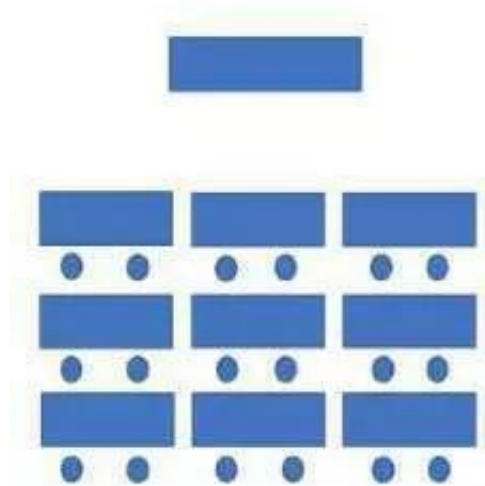

- Your learners
- The places where you teach
- How much choice you have over what you teach
- How much choice you have over how you teach

Small-group discussion | 5 mins

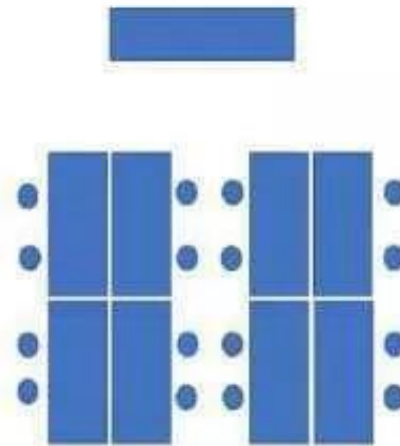

SEATING

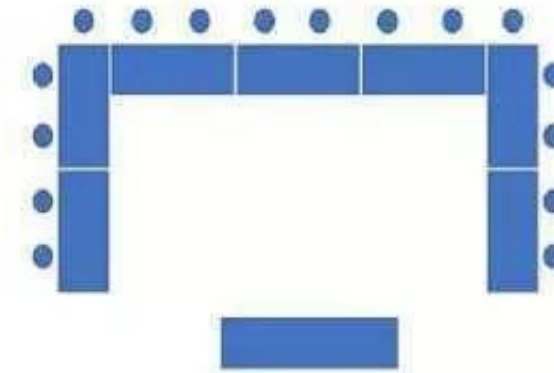

Seating Plans

Rows

Groups

Horseshoe

SEATING

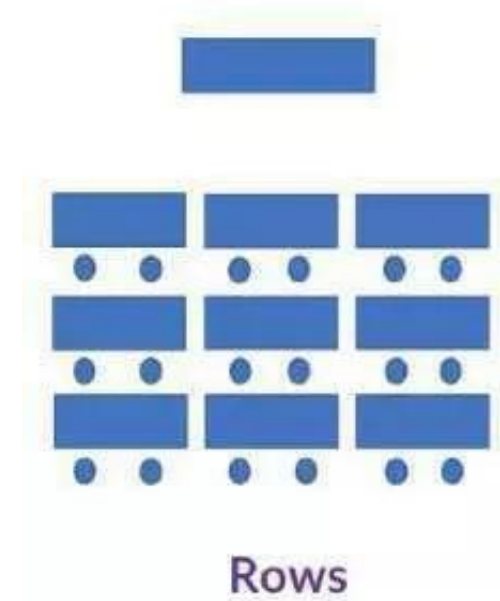

Rows

Learners all face forward

Good for exams

Working in pairs and Independent work

Good for maintaining order, a calm and quiet environment

SEATING

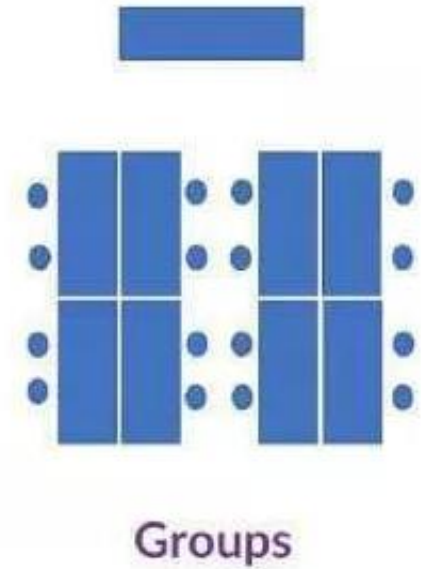

Groups

Learners face each other which promotes collaboration and discussion

Good for group work

More lively and interactive

Focussed on peer discussions

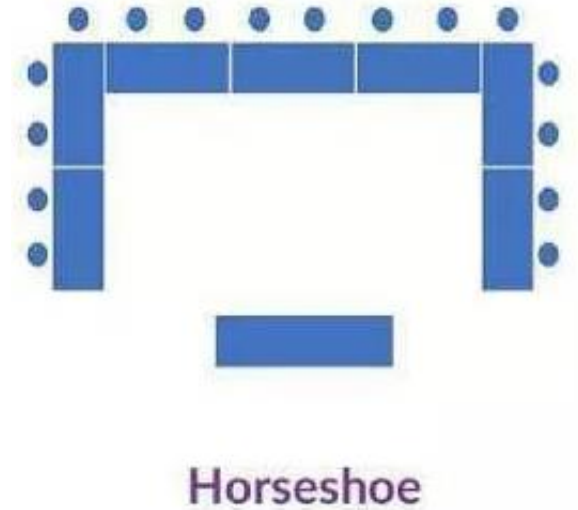

SEATING

Horseshoe/semicircle/U-shape

Learners face each other but also to maintain sight of the teacher

A hybrid approach

Still encourages discussion

SEATING

The optimal classroom layout will depend entirely on

- the teacher's learning objective
- the nature of the activity
- the preferred behaviour

Which setup you prefer?

CLASSROOM MANAGEMENT

Daily **routines** can help learners

So they know what to expect
and what is expected of them

Routines can save time as well

CLASSROOM MANAGEMENT

Use predictable procedures for:

Starting and ending lessons

Homework and materials

Transitions between activities

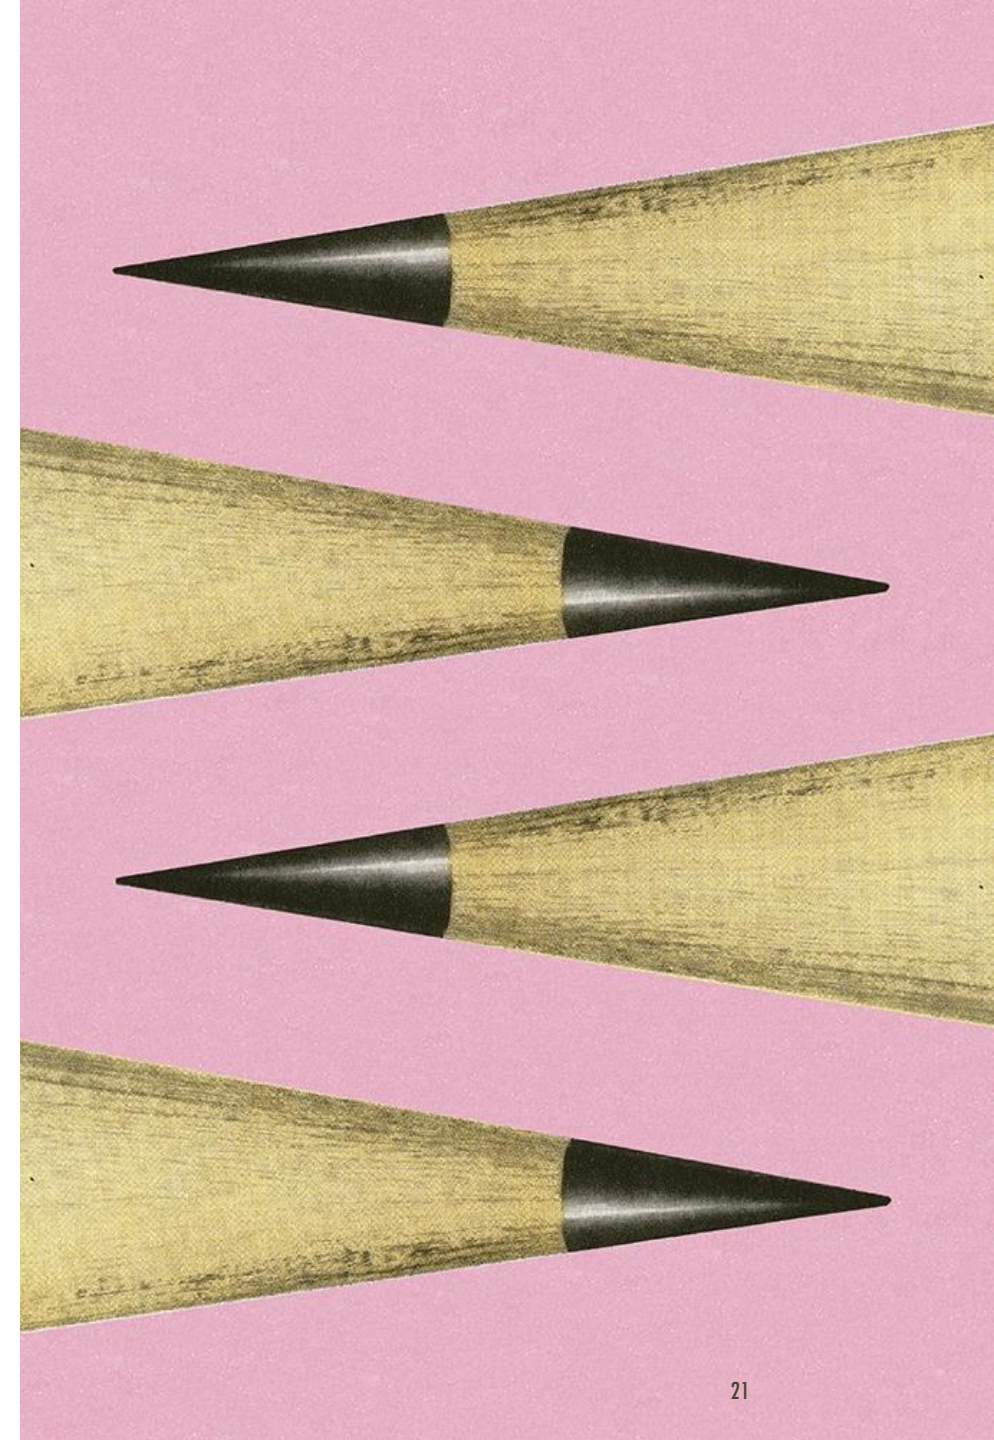

Asking questions and requesting help

CLASSROOM INSTRUCTIONS

1. Give instructions that are short, clear, and logically sequenced
2. Explain what learners need to do, how, and for how long
3. Break complex tasks into smaller steps

Use **examples**, demonstrations, visuals, or gestures when appropriate

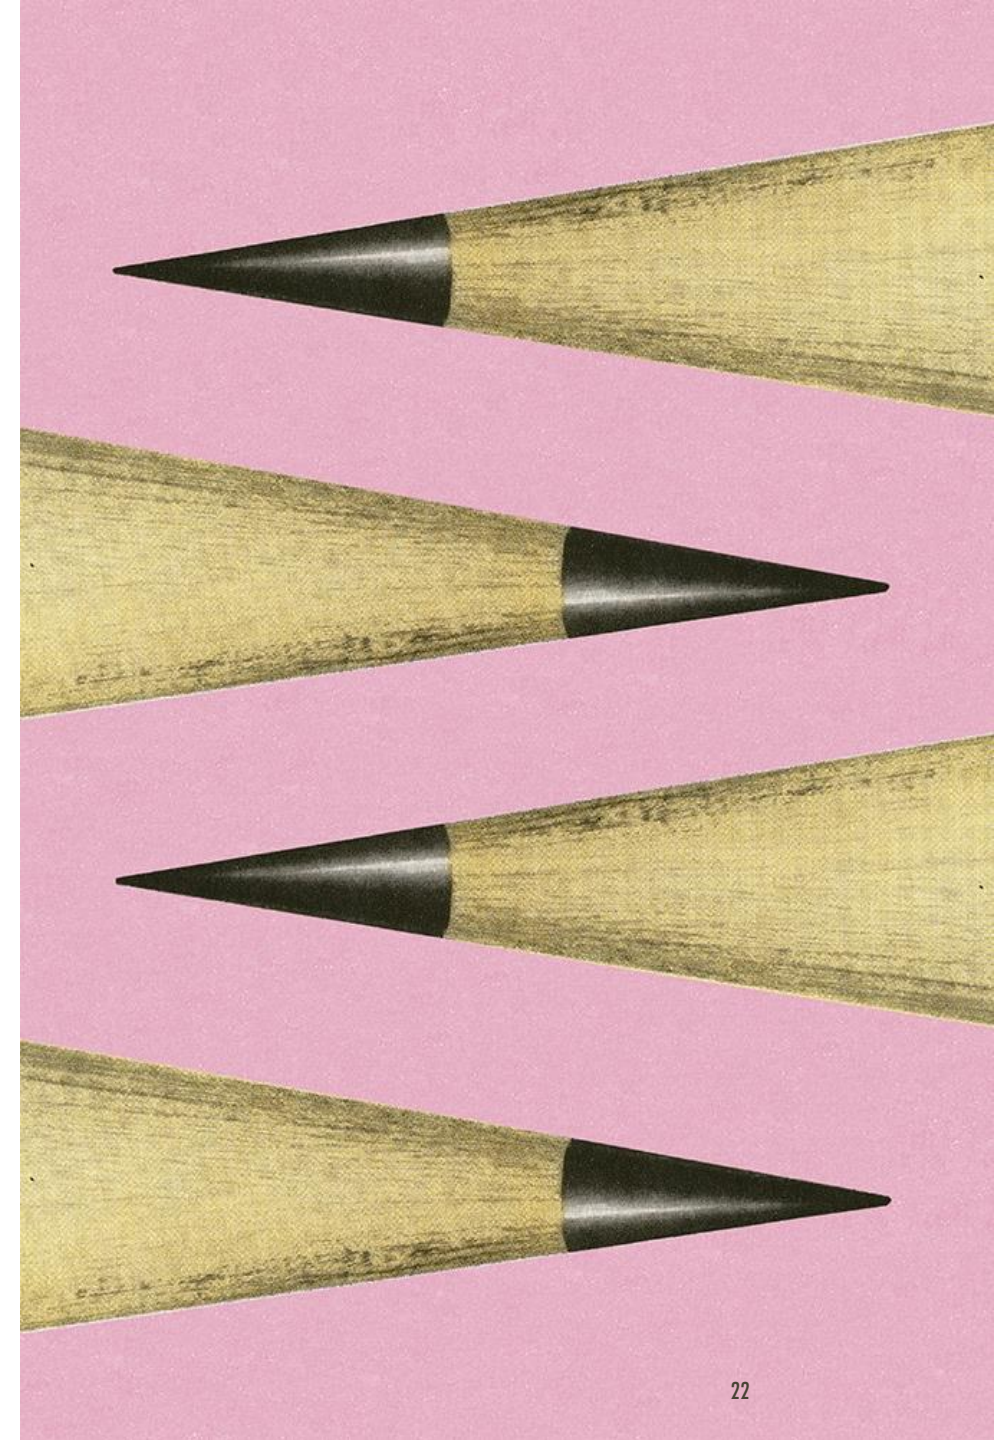

CLASSROOM INSTRUCTIONS

4. Check understanding rather than simply asking, “*Do you understand?*”

- Ask learners to repeat or explain the task in their own words
- Ask learners to explain the task to each other
- *No harm in translating essential terms?*

5. Give learners time to process instructions before starting

EFFECTIVE LESSON PLANNING

1. SET CLEAR OBJECTIVES

2. ORGANISE ACTIVITIES IN A LOGICAL ORDER

3. TIME MANAGEMENT

3. TIME MANAGEMENT

1. Decide/estimate how much time to spend on each activity
2. Allow enough time for practice, feedback, and **questions**
3. Indicate how much time is assigned to practice and discussions
4. Keep some flexibility in case activities take longer/shorter than expected

EFFECTIVE LESSON PLANNING

1. Set clear objectives
2. Organise activities in a logical order
3. Time management/allocation

This becomes easier with practice!
Even experienced teachers still struggle sometimes!

Anticipate potential difficulties
