

OVERVIEW OF OUR 1.5 DAYS TOGETHER

DAY 1

9:00 – 10:00 Session 1: Classroom Management for SLA

10:30 – 12:00 Session 2: Combining SLA Theory with Practice

12:00 – 13:30 lunch

13:30 – 14:50 Session 3: How to Teach Vocabulary Effectively

15:10 – 16:30 Session 4: Grammar Teaching

DAY 2

9:00 – 10:00 Session 5: Language Assessment

10:30 – 12:00 Session 6: AI Role-Play Activities in SLA

12:00 – 12:30 Feedback and Evaluation

The background of the slide is a soft-focus photograph. On the left, a hand holds a pen, poised to write on a document. The document features a table with multiple columns and rows of text. On the right side of the image, another hand is visible, holding a pen and writing on a separate sheet of paper. The overall lighting is warm and natural, creating a professional and focused atmosphere.

Session 5. Language Assessment

Margreet Vogelzang

OBJECTIVES

By the end of the session, you will be able to:

- **Understand** aims of assessment and types of assessment
- **Think critically** about what makes feedback effective
- **Explore** the ongoing impact of technology on language assessment

OVERVIEW

- Types of assessment
- Feedback
- The impact of tech on language assessment

LANGUAGE ASSESSMENT

ASSESSMENT

Common Conception and Expectation 1

An assessment is either “good” or “bad”, depending on whether it satisfies one particular quality

ASSESSMENT

Common Conception and Expectation 2

There is a single “best” assessment for any particular situation

ASSESSMENT

Aims

to measure learner's ability

to identify strengths, weaknesses, progress, and learning needs

Formative Assessment

Takes place **during the learning process**

Helps teachers identify students' strengths and weaknesses

Provides **feedback** to improve learning

Examples: quizzes, classroom activities, questions, draft work, ...

Summative Assessment

Takes place **at the end of a course, unit, or learning period.**

Measures what students have learned and achieved.

Usually contributes to a **final grade or result.**

Examples: final exam, presentation, interview, ...

CRITERIA FOR ASSESSMENT

Validity: measures what it is intended to measure

Reliability: produces consistent results

Fairness: gives all learners an equal opportunity to demonstrate their ability

Clarity: instructions and assessment criteria are clear and easy to understand

Practicality: is manageable in terms of time, cost, and resources

Authenticity: reflects real-life language use

ASSESSMENT CRITERIA & EVALUATION STANDARDS

We use assessment criteria to judge a learner's performance

For example:

- **Fluency:** Can the learner communicate smoothly?
- **Pronunciation:** Is the learner easy to understand?
- **Vocabulary:** Does the learner use appropriate and varied words?
- **Accuracy:** Is the language (grammatically) correct?
- **(Task achievement:** Has the learner completed the task successfully?)

Be as specific as you can!

NO ONE SIZE FITS ALL

Individual differences in strengths and weaknesses of learners

Individual differences in assessment preferences of learners

Stress can affect assessment performance

- Anxiety and pressure can affect memory, concentration, and communication
- A learner's performance under stressful conditions may not fully reflect their actual ability

FEEDBACK

Feedback is an important part of language assessment, especially for formative assessment – but also for summative assessment

FEEDBACK

Feedback gives learners information about their performance and progress

It helps students understand what they did well and what they need to improve

Effective feedback should be:

- Clear and specific
- Constructive and supportive
- Timely
- Focused on improvement

Feedback can be written, verbal, peer-based, or self-assessment

THINK — PAIR — SHARE

How do you currently provide feedback?
What issues have you encountered?

THE IMPACT OF TECH

THE IMPACT OF TECH ON LANGUAGE LEARNING/TEACHING

Distance learning allows flexible education

Digital textbooks with interactive elements enhance engagement

Adaptive learning environments personalize study experiences

Teachers can efficiently track student progress

THE IMPACT OF TECH ON LANGUAGE ASSESSMENT

Aim: Adapt to technological changes while maintaining communicative assessment principles

A moment of transition in assessment

Paper-and-pencil

Fixed space

Fixed time

Learn-stop-test

'Big' exam

Human

Digital

Remote

On demand

Integrated L & A

Micro-credentials

AI

TECHNOLOGY IS USED TO...

- write and store tasks
- create and deliver tests
- calculate and store statistical data
- register candidates and store data
- mark and calculate scores
- invigilate
- produce certificates
- check for malpractice
- compile candidate responses (written and spoken)
- plus much more...

ADAPTIVE TESTING: TAILORING TO LEARNER ABILITY

Computer-Adaptive Testing (CAT):

- Adjusts difficulty based on performance
- Reduces anxiety and fatigue
- Shorter tests with immediate results
- Example: Linguaskill

Why choose Linguaskill

Linguaskill ▶▶

AI-POWERED *SCORING* FOR QUICK RESULTS

Computer-Based (CB) Testing:

- Enhances flexibility and efficiency
- Allows on-demand testing

AI-assisted marking:

- Hybrid approach (AI + human raters) ensures accuracy
- AI flags uncertain scores for human review
- Faster result turnaround enhances decision-making
